Question 9

During Hurricane Ida (2021), some water got into the basement, which receded quickly. We were told that the water likely entered through the shower drain (and not through the foundation or windows). At the time, the basement did not have a sump pump or french drains.

We immediately had the basement professionally dried, removed the affected drywall and wood trim, applied an anti-mold treatment, and replaced the flooring and drywall. We also installed a sump pump with battery back-up and french drains along the perimeter.
